Talking Through Your Code

SUBMIT HERE: https://classroom.github.com/a/BS0bZGjr

Instructions:

Watch the videos below to see how to talk through your code while solving a problem.

https://youtu.be/VX2oZkDJeGA

https://youtu.be/xG6In1ISnB0

Write down 2-3 things you might need to work on so you can become better at talking through your code while solving a problem.

1) Take your time for breaking down your code and see if I understand it first
2) Figure out what to solve
3) Reference back to the main question every time you write a line or a part of your code
